PROFESSIONAL SUMMARY

Frontend Developer and UI/UX Designer with hands-on experience delivering accessible, responsive digital products across web and mobile platforms

Proven ability to own projects end-to-end — from Figma design concepting through to production deployment using React, Next.js, and TypeScript

Equally effective working independently on client-facing builds and as a collaborative contributor within agile, cross-functional teams

EDUCATION

Bachelor of Information Technology — Software Development

Expected April 2028

Southern Alberta Institute of Technology (SAIT) — Calgary, AB

- **Diploma — Information Technology, Software Development Completed** *April 2026*

- **Design & UX:** Figma, Adobe XD, Responsive Design, Accessibility (WCAG), Canva
- **CMS & Marketing:** WordPress, SEO, Social Media Management, Google Analytics
- **Tools:** Git, GitHub, Vite, Claude AI, Cursor (and other relevant AI), Jenkins (familiar)
- **Practices:** Agile/Scrum, Code Review, Debugging, Testing, Front-End DevOps

PROFESSIONAL EXPERIENCE

Tech Connect Alberta – Web Developer and Web Designer

June 2026 – July 2026

Calgary, AB | Contract / Summer Internship

- Sole designer and developer on end-to-end website builds for startup clients — owning every stage from client discovery and research through final delivery and handoff
- Engineered fully responsive, multi-page websites using HTML, CSS3, JavaScript, and Tailwind CSS, ensuring consistent cross-device rendering and polished visual execution
- Collaborated directly with a developer and stakeholders to translate business requirements into cohesive UI designs, managing client communication and iterative feedback throughout the project lifecycle

Web Designer & Frontend Developer — MLC Subsea Navigation

April 2026 – June 2026

Calgary, AB | Contract / Internship

- Sole owner of a complete digital brand website builds for an international marine and subsea services company — responsible for every stage from discovery through deployment.
- Engineered a fully responsive, multi-page website using Vite, JavaScript, and Tailwind CSS, achieving fast load performance and consistent cross-device rendering.
- Developed a cohesive visual identity system encompassing typography, colour palette, and layout grid — ensuring a unified, premium brand presence across all pages.
- Leveraged Claude AI strategically to accelerate content development and design iteration, compressing timeline while maintaining high output quality.

Marketing & Designer – Enactus SAIT

June 2026-Present

Calgary, AB | School Club Volunteer

- Designed and delivered social media graphics and promotional content using Canva and Figma, aligned with SEO and digital marketing best practices
- Produced consistent, on-brand visual assets for club campaigns, supporting audience engagement and online visibility
- Applied AI tools to streamline content creation workflows, accelerating design output for social media deliverables

Social Media & Digital Marketing Manager — IDI Calgary (Volunteer)

2022 – Present

Calgary, AB

- Directed full-spectrum digital presence across Instagram, Facebook, and YouTube — developing content strategy, managing publishing calendars, and growing audience engagement.
- Produced branded graphics, event promotions, and campaign assets using Figma and Adobe XD, maintaining consistent visual identity across all channels.
- Managed website content and performance using WordPress, implementing SEO improvements that enhanced discoverability and visitor experience.
- Analyzed platform metrics monthly, translating insights into strategic content pivots that demonstrably improved reach and community interaction.

Front End Designer & Web Developer — Sky Air Supply Ltd.

July 2025 – August 2025

Calgary, AB | Co-Op

- Led frontend design and development of responsive, cross-device web experiences using HTML, CSS, and JavaScript — establishing visual design standards across all brand touchpoints.
- Drove an iterative UI design process in Figma and Adobe XD, from low-fidelity wireframes through to polished, developer-ready prototypes.
- Administered and optimized CMS-based content workflows, maintaining brand consistency and content quality standards across all published pages.

PROJECTS

GoApricot Mobile App — Lead Designer & Developer

2026

- Spearheaded end-to-end design and development of a cross-platform mobile app using React Native (Expo), TypeScript, and Tailwind CSS — from concept through to App Store-ready build.
- Designed a full interactive prototype in Figma, facilitated user testing, and iterated on feedback to optimize usability and visual clarity.
- Established and maintained the team's Git workflow, leading code reviews and enforcing quality standards across all pull requests.

Apply Alberta Website (Campus Navigator) — Lead Designer & Front-End Design

2026

- Engineered a mobile application in TypeScript and React Native with a strong emphasis on intuitive interface design, fluid navigation, and performance across device sizes.
- Contributed to sprint planning, feature scoping, and collaborative debugging within a structured agile team.

MLC Subsea Navigation Website — Frontend Developer & UI Researcher

2026

- Designed and built a professional multi-page website for a marine services client using Vite, JavaScript, and Tailwind CSS — delivering a polished, fully responsive product optimized for performance and cross-browser compatibility.
- Developed a cohesive visual identity system and structured page layouts to communicate a premium, client-facing brand presence effectively across all devices.

LockIn AI - Hackathon Community Choice Award

- Built a gamified focus web app during a hackathon that helps users stay productive by running timed study sessions with distraction control, focusing on practical problem-solving and real user behavior improvement.

- Designed and implemented an interactive UI experience where completed focus sessions grow a virtual garden and a companion character reacts to user progress, emphasizing frontend development, user experience design, and teamwork in a fast-paced environment.
